PROFESSIONAL SUMMARY

IT System Administrator with 9+ years of hands-on experience managing on-premise and cloud infrastructure supporting 6 business entities within a group structure, totaling ~150 host servers. Experienced in delivering remote, multi-site IT support to keep distributed operations running efficiently without requiring on-site presence. Skilled in server virtualization and containerization, backup and disaster recovery, cloud platforms (VMware, GCP, AWS, Azure), mail infrastructure administration, and cross-functional support for enterprise systems (SAP, ERP, HRIS, BPMN). Known for translating complex, multi-entity infrastructure needs into stable, well-documented, and secure operations.

CORE COMPETENCIES

- Networking & Security: Fortigate, Mikrotik, Ubiquiti, Ruijie, Sophos
- Cloud & Virtualization: VMware, Google Cloud Platform (incl. GCP Snapshot), AWS, Microsoft Azure, Biznet, Docker
- Systems Administration: CentOS, Debian, Ubuntu, Windows Server, Windows 7/8/10/11
- Scripting & Automation: Bash, Cron Job Automation, PHP
- Backup & Recovery: Nakivo, Synology NAS, GCP Snapshot, PostgreSQL, SQL Server, Google Drive Sync
- Enterprise & Mail Infrastructure: Zimbra, Google Workspace, LDAP, Tomcat, Apache, Synology, Nakivo, SAP Business One, Openbravo, BPMN, N8N

PROFESSIONAL EXPERIENCE

PT. Pancaran Darat Transport (Member of Pancaran Group) | Jul 2017 – Jul 2026

IT System Administrator (2019 – 2026)

- Managed and maintained on-premise and cloud server infrastructure (VMware, GCP) totaling ~150 host servers, supporting daily operations across 6 group entities (PDT, Petra, PLI, PST, PMT, PSS).
- Administered containerized and virtualized application environments to ensure system stability and uptime.
- Managed and executed backup and restore operations for servers, systems, databases, and configurations, ensuring data integrity, business continuity, and minimal downtime during recovery.
- Implemented multi-layered backup strategy using GCP Snapshots for cloud instances, Nakivo for VM and server backup, and Synology NAS for centralized on-premise backup storage.
- Developed and scheduled Bash-based cron jobs to automate PostgreSQL and SQL Server database backups, including routine restore verification.
- Maintained Google Drive file synchronization as an additional off-site copy for critical files and backup archives.
- Owned end-to-end SSL certificate lifecycle management, maintaining uninterrupted secure access for internal and external services.
- Administered enterprise mail infrastructure across Zimbra (~2,000 accounts) and Google Workspace (~600 accounts), totaling ~2,600 mailboxes organization-wide.
- Supported deployment and ongoing maintenance of enterprise applications including SAP, HRIS, ERP, and BPMN-based workflow systems.
- Researched and piloted open-source tools to strengthen operational efficiency and performance stability across production environments.
- Authored system architecture and operational documentation, standardizing IT processes across the department.
- Delivered remote IT support across multiple sites, resolving issues without requiring on-site travel and improving overall response efficiency.

IT Support (2017 – 2019)

- Diagnosed and resolved network issues (LAN, Wi-Fi, peripherals), minimizing operational downtime.
- Managed IT hardware/software procurement and asset administration.
- Maintained internal documentation to support IT service continuity.

PT. Paradise Jaya Teknik | May 2016 – Apr 2017

Project Supervisor, Air Conditioner Installation

- Prepared and submitted project bids and quotations for AC installation contracts.
- Served as primary point of contact for client coordination throughout the project lifecycle.
- Monitored project budgets and tracked progress against agreed timelines.
- Delivered after-sales support and prepared project completion reports.

EDUCATION

Bachelor of Information Systems (S1) — Universitas Bunda Mulia, Jakarta (2012 – 2016)

SMAN 40, Jakarta — Science Program (IPA) (2009 – 2012)

SMPN 34, Jakarta (2006 – 2009)

SDN Gunung Sahari 01, Jakarta (1999 – 2006)

CERTIFICATIONS & TRAINING

- AWS Cloud Admin — 32-hour training program, IDN.ID Training Center (Nov 2023)
- Computer Networking Fundamentals (Jaringan Komputer Dasar) — ID-Networkers, valid through Sep 2026
- Linux Fundamentals (Linux Dasar) — ID-Networkers, valid through Sep 2026
- Get Started with Google Workspace Tools — Skill Badge, Google (Productivity & Collaboration)
- BPMN & AlurKerja Training — LPK Geek Academy (Jun 2026)
- Basic Cyber Security Awareness — Cybercave.id (Nov 2022)
